

Location: Ag Hall 122

Date: 7/7/2015

**Seminar Time: 1:00-1:30
followed by Q&A**

Dr. Xiangming Xiao
presents

Remote sensing of ecosystem composition, structure and function

Dr. Xiao is a professor of ecology and remote sensing at the University of Oklahoma. His broad research interests include land use and land cover change, biogeochemical cycle, climate, water, earth system modeling as well as disease ecology and epidemiology. In this seminar, he will review recent progress in remote sensing and applications in ecosystem composition (biodiversity), structure and function, and provide a few case studies from Oklahoma and around the globe.
